ALUMINIUM SLIDING DOORS

APX20 PLUS

THE SLIDING DOOR BUILT FOR OPENINGS OTHER SYSTEMS CANNOT SPAN

- Sashes Up to 4000 x 4000mm
- Up to 94% Glazed Surface
- Manual 400kg or Motorised 700kg

Sashes reach 4000 x 4000mm and carry up to 14m² of glass, so a single panel can cover an opening most systems have to break into sections. A central junction of just 25mm and fully embedded perimeter frames lift the glazed surface to 94%, leaving almost nothing but view. Panels of up to 400kg move by hand and up to 700kg on the motorised system, and the track can be recessed or set flush with the floor for a level threshold inside to out.

- 25mm Central Junction
- Glazing Up to 56mm
- 10 Year Guarantee

APX20 PLUS SYSTEM

SIZE LIMITS
