LIFT AND SLIDE DOORS

SCHÜCO ASE

GERMAN-ENGINEERED LIFT
AND SLIDE DOORS, BUILT
AROUND YOUR OPENING

- Sashes Up to 3500mm and 500kg
- Concealed Fittings and Locking
- Burglar Resistance Up to RC2

The ASE is a modular lift and slide system, so a single sash can reach 3500mm and carry up to 500kg while a complete unit runs to 21 metres wide, in single, double or triple track or around a 90 degree corner. Turn the handle and the sash lifts onto stainless steel rollers, then settles back onto its seals to clamp tight. Fittings and locking are concealed inside the frame groove, the threshold sits under 12.5mm for genuinely level access, and thermal performance starts at 1.1 W/m²K.

- Level Threshold Under 12.5mm
- Glazing Up to 40mm
- 10 Year Guarantee

SCHÜCO ASE 60 SYSTEM

SIZE LIMITS
